# TELEGRAPHIC.

Sr. Louis, June 15-On the eve of the tenth national convention of the republican party, St. Louis resembles a bride bedecked for the coming of her liege lord. Buildings flame with bunting. windows are adorned with pictures of the various candidates, the air beats with the pulsation of music, parading clubs are sweeping by and the streets surge with people borne along in resistless streams while the hotel corridors are chocked with jostling, pushing masses of humanity. It is estimated that 75,000 strangers are guests of the Mound City tonight.

The most remarkable feature of the convention so far has been the absence of bad blood among the partisans of the various candidates. The triumph of McKinley has been so complete thus far that his friends can afford to be nagnanimous and his opponents can do nothing but acquiese in the will of the majority. Partienns of Reed, Quay, Morton and Allison still wear their buttons and are as staunch as ever in their loyalty, but they realize the hopelessness of making shricking or offensive demonstrations in favor of their champions, and managers of the anti-candidates have practically sheathed their swords. This does not mean that they have abandoned the field. With the gates have gone and alternates have bave abandoned the field. With the taken their places. The chairman an exception of Gov. Bradley of Kentucky, who dropped out last night, tue names of the other candidates will be pres ented and voted for and will probably poli their full strength.

The real struggle that is going on over the financial plank in the platform. Free silver and gold are as irreconcila-ble as the poles and radical silver men are prepared to stake their all upon the issue. Knowing they cannot succeed they are even now formulating a manifesto that will sever their allegiance to the republican party. But these radi-cal silver men are largely outnumbered. Headed by Senator Telier of Colorado, they have only mustered five states and perhaps one territory, less than fifty delegates in all out of a total of over 900. The real struggle is between those who favor a bold declaration for the maintenance of a gold standard except through an international agreement and these whose friendliness to silver all.

those whose friendliness to silver, al-though opposed to free coinage, makes them seek to avoid a specific declaration for a gold standard. The exact lan-guage of the plank has not yet been drawn, but Mark Hanna, to whom all and Eddie Heaton are going to the drawn, but Mark Hanna, to whom all oracle for an outing of a couple of weeks. Sr. Louis, June 17-The silver repub licans in the national convention have practically decided that whatever they may do in the convention or elsewhere they will do nothing for mere theatrics; effect. They will present a sustitute for the financial plank in the platform for the free coinege of silver and will con-sums whatever time may be allowed them for speeches in earnest presentation of their cause. When the convenand accept a gold standard platform a number of free silver delegates, especially those from the silver producing states, will simply walk out of the convention and proceed to quarters of their own, where they will adopt a protest against the course pursued and appeal to the country for the endorsement of

We believe in liberal reciprocity and ust relations. We favor the restoration of the early American policy of discriminating du-ues for the upholding of our merchant marine and the protection of our ship

ping. We are unalterably opposed to every measure calculated to de-base our currency or impair the credit of the country, and we are there-fore opposed to the free coinage of silver except by international agreement with the leading commercial nations of the world, which we pledge to promote when such an agreement can be obtained. The existing gold standard must be preserved. All silver and paper currency now in circulation must be maintained at a parity with gold and we favor all measures designed to maintain inviolable the obligations of the U.S. and all our money, whether coin or paper at the present standard. The foreign plank favors the Monroe doctrine and endorses the administration of President Arrason on the attitude of this country oward Hawaii. It demands the protection of our citizens abroad. It favors awarding Cubans belligerent rights. A decisration is made in favor of a liberal pension policy. A declaration is made in favor of arbitration between employed and employer but no specific legisla-tion. It demands the building of the Nicaragus canal by the government.

INTHE EAST.

The Situation as Viewed by a Visitor From Tucser

Dr. Mark A. Rodger's returned last vening from an exten ded trip east. His acation was spent among the large cities in that section, and the doctor re-turns to his home more deeply impress-ed than ever with the future greatness of Arizons. Mammon.
The chunk of gold they had was from a run of 180 hours, or 18 days at 10 hours a day, and is valued at \$3084. The Mammon mine is situated 28 miles south of Casa Grande. It is a fissure vein, in elate, and has at pres-ent two working shafts each 200 feet deec. There is a four-foot streak of gold ore that averages \$27 per ton, and it lies so conveniently for working that it is estimated that two first-class miners

can supply a sufficient quantity of ore to keep a 10-stamp mill in constant operation. Previous to Mr. Isgrigg's

management of the mine, no one had been able to make it pay. Now, however, the fact that it is a paying proposition is fully demonstrated.
